About Me

Main core in **ReactJS, React Native and Next.js** with more than 3 years experience in the fintech industry. Passionate about building user-focused, high-performing web interfaces. Excels in **Agile environments**, collaborating closely with cross-functional teams to deliver innovative solutions. Eager to contribute to **a team that values excellence and continuous improvement**.

Education

BSc (Hons) e-Business Technology & Management

Liverpool John Moores University, UK 3+0 (Aug 2021)

Award Classification : Bachelor in Science with Honors Class I (73%)

Main Technical Skills

Wireframing & Prototyping : **Figma, Marvel**

Programming Technologies & front-end framework: **ReactJs & React Native, NextJS, TypeScript**

Version Control: **Git, GitHub**

Development Methodology: **Scrum & Agile**

Experience

FRONTEND DEVELOPER – Banking | Accenture Technology
August 2024 – Current

- Developed core features for the digital bank app using React Native and JavaScript.
- Delivered an upgraded Secure2u (S2U)-enabled transaction flow with improved security and service logic, leveraging a newly integrated backend service.
- Implemented enhancements for m2u push notifications, 2FA, RSA authentication, and fallback handling across main transfer flows and services as part of the new s2u enhancement and security initiatives.
- Actively involved in the entire development lifecycle of new transfer enhancement initiative, supporting SIT, UAT, pentesting, and deployment.

FRONTEND SOFTWARE ENGINEER | MoneyMatch Sdn Bhd
Feb 2023 – Apr 2024:

- Launched web and mobile-optimized pages **from the ground up** for **moneymatch.co** with Next.js and Strapi CMS, assisting in SEO rankings together.
- Enhanced the fintech platform by developing and integrating Orbit Flow with React.js, aimed at increasing user engagement and streamlining remittance handling processes.
- Collaborated with cross-functional teams in an **Agile environment**, focusing on sprint planning, stand-ups, and retrospectives, enhancing project delivery and team efficiency.
- Consistently maintained a completion **rate of 70% to 100%** for assigned tickets within two-week sprints, ensuring high productivity and timely project delivery.

TECH TRAINEE (BESQUARE) | Deriv Services Sdn Bhd
Jul 2022 – Dec 2022 :
- ➢ Completed an intensive training program with hands-on experience in **Frontend Development**, **Product Design**, **Backend Development**, **Mobile Development**, **Cybersecurity**, **Business Intelligence**, and **Quality Assurance**.
- ➢ Led the **frontend development team** in creating responsive web applications using **React**JS
- ➢ Applied **Cybersecurity** concepts including network and web application security, network penetration testing, digital forensics, utilizing tools like
- ➢ **Mobile Development**: Led the development of a cross-platform food recipe app with Dart/Flutter, using a single codebase and public APIs.
- ➢ **Backend Development:** Gained experience with blockchain, cryptocurrency, SQL, API integration, Docker, and Redis for scalable systems.
- ➢ **Hackathon Achievement:** Led a team that won 2nd place in a cryptocurrency-focused hackathon, demonstrating strong problem-solving and teamwork.
- ➢ Conducted **manual and automated testing** using the Robot Framework for the Deriv website, ensuring high-quality deliverables.
- ➢ Applied **UI/UX** design principles using Figma and Marvel, collaborating on mobile app prototypes, pitching training.

JUNIOR SOFTWARE ENGINEER | BP Healthcare / Doctor2u
Sept 2021 – Jun 2022 :
- ➢ Conducted thorough user requirement reviews and analyses to ensure alignment with project objectives and user needs.
- ➢ Front-end: implemented responsive UI for Airport project for both admin and customer side using Angular material and TypeScript.
- ➢ Back-end: Developed interactive dashboards and efficient report generation mechanisms for the administrative facet of the Airport website using C#.
- ➢ Enabled seamless collaboration with business counterparts for instant updates and adjustments to project details, ensuring flexibility in responding to changing requirements, particularly crucial in fast-paced environments.

Projects/ Hackathon / Freelance

Blockchain
private freelance project involving an EVM-compatible blockchain and smart contracts, with a focus on frontend development using **React.js and MobX** for state management, and participated in backend integration.

Developer Readiness Challenge | Deriv (Cryptown web application) , Nov 2022 – Dec 2022
Spearheaded front-esnd development for an innovative cryptocurrency education platform. Orchestrated seamless integration with backend APIs for optimal user experience.
We won second place.

Front-end : **ReactJS (context state managemenyt), Mui, JS, Docker**

More projects : https://umairatl.vercel.app/
